citizens

“At root here is a fundamental dilemma. Those personal qualities that we hold dear — *resilience and courage in the face of stress, a sense of craft in our work, a commitment to justice and caring in our social relationships, a dedication to advancing the public good in our communal life* — are exceedingly difficult to assess. And so...we are apt to measure what we can, and eventually come to value what is measured over what is...unmeasured. The shift...occurs gradually...In neither academic nor popular discourse about schools does one find nowadays much reference to the important human qualities. The language of academic... tests has become the primary rhetoric of schooling.”

National Academy of Education, 1987

Data and Their Purpose

- Remember Dr. Cordogan's 12,675 pieces of data...
- Data is only as valuable as how we use it.

Moving Forward with Data: Forest and Trees

Forest Data: The Medical Model

- Big Picture Evaluation
- Overall health
- Where we stand
- Are there *red flags*?

Tree Data: The Athletic Model

- Specific strengths and weaknesses
- Detailed diagnosis
- Alignment to Practice
- Areas for improvement

Medical Model - key indicators

Fig. 2. Height measurement. (Image shown with consent.)

Reflective *NOT* Reactive

- In Context
- Over Time
- Measuring Height

Published May 30, 2000.

SOURCE: Developed by the National Center for Health Statistics in collaboration with the National Center for Chronic Disease Prevention and Health Promotion (2000).

SAFER • HEALTHIER • PEOPLE

District Model - key indicators

- PARCC
- MAP
- AP
- ACT

- Monitor Progress and Track Growth.
- Watch for 'red flags'.
- Continue to contextualize the data over time.

❖ Disaggregation is critical!

PARCC

- Acknowledge the significance of PARCC as an accountability measure.
 - Watch as more information unfolds and be prepared to evaluate our data accordingly.
 - Continue to be reflective as we receive ongoing data and the assessment improves.
- ❖ Disaggregation is critical.

MAP

- Continue administering the MAP and evaluate patterns.
- Explore appropriate analytical perspective for certain circumstances
 - RiT vs Percentile, etc.)
- Reflect and analyze use at the K-1 Level.
- Explore usefulness of the data at the building/classroom level and curriculum/assessment alignment.

❖ Disaggregation is critical.

	<u>Ka</u>	Kb	<u>1a</u>	<u>1b</u>	<u>1c</u>	<u>2a</u>	<u>2b</u>	<u>3a</u>	<u>3b</u>	<u>4a</u>	<u>4b</u>	<u>5a</u>	<u>5b</u>

Advanced Placement (AP)

- Evaluate course level data and seek potential areas for growth.
- Continue to explore opportunities for expansion of AP *
 - Who can/should take course?
 - Consider potential for additional courses.

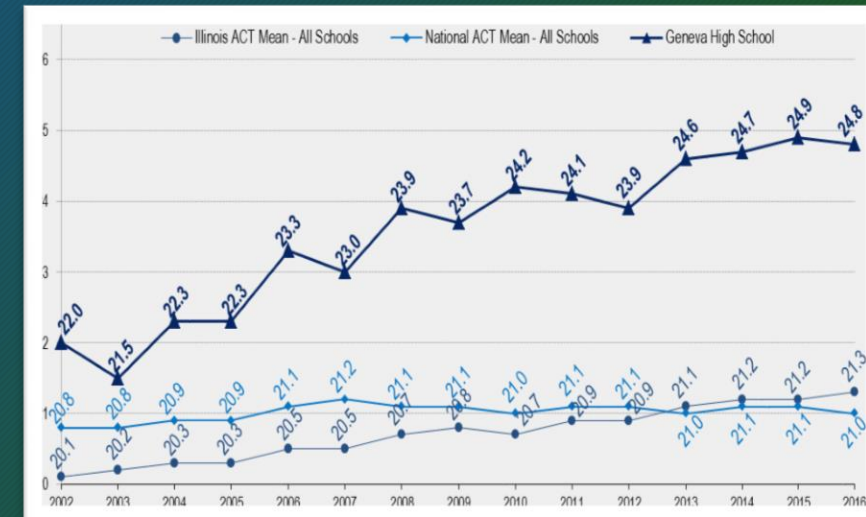

* Remember to focus on our vision in the work.

❖ Disaggregation is critical!

ACT (Now SAT)

- Recognize that we are beginning with a new assessment.
- Maintain the positive trajectory that has been underway with ACT.
- Continue to focus on quality instruction and curricula.

General Diagnosis

Our
district
is
Very
healthy.

District Model - key indicators

- PARCC
- MAP
- AP
- ACT

- Monitor Progress and Track Growth.
- Watch for 'red flags'.
- Continue to contextualize the data over time.

Local Formative Assessment

- Directly Aligned to the Curriculum
- Useful for teachers in guiding instruction
- Ongoing
- Allows for differentiation in approach and model
- Provides more value to teachers but offers less standardization

Common Course Collaboration

- Common Learning Targets
- Course-specific assessments
- Exploration of mastery-learning

Looking Ahead

- Ongoing *Checkups*
- Continue to seek areas for improvement with ongoing measures.
- Continued work and progress with local/formative assessments...
 - And improving our capacity to use this data on district level.
- Explore options for improvement of the management and organization of local data.
- And...

**we
are**

self-directed,
lifelong learners

effective
communicators

complex, creative
& adaptive
thinkers

collaborative
& productive
citizens
