

Math Module 2 Study Guide

- Students will be expected to be able to tell the difference between centimeters and meters.
- Students will be expected to estimate the length of an object using centimeters and meters. (Ex: is the length of a glue stick best measured in centimeters or meters.)
- Students will be expected to compare two lines to determine which one is longer/shorter and by how much.
- Students will be able to add and subtract using a ruler as a number line.
- Students will be expected to be able to use a centimeter ruler to measure an object.
- Students will be expected to measure an object using a paperclip. The purpose to line and mark the object repeatedly. (Ex: start at the beginning of an object measuring with a paperclip, mark a line, move the paperclip to the line, and mark again).
